

OBJECTIVE

Enthusiastic iOS developer with experience as a Trainee Software Engineer, skilled in Swift and SwiftUI. Successfully led the development of a healthcare app, integrating advanced video conferencing and optimizing performance for enhanced user engagement. Eager to leverage technical expertise and a solid computer science background to innovate and elevate user-centric solutions in iOS development.

EDUCATION

Master's in computer science.

University of North Carolina at Charlotte.

Jan 2024 – May 2025

Bachelor's in Electronics and Computer Engineering.

Sreenidhi Institute of Science and Technology.

July 2018 – May 2022

WORK EXPERIENCE

Trainee Software Engineer.

Mar 2022 – Dec 2023

Concentrix Catalyst

- Led the end-to-end development of a healthcare app for clinicians using **Swift** and **SwiftUI**, achieving a **20%** increase in user engagement through performance optimization and seamless user experience across Apple devices.
- Integrated **Zoom SDK** for advanced video conferencing, enabling real-time clinician-to-patient and clinician-to-clinician interactions, improving digital healthcare services.
- Optimized app performance by reducing load times by **30%** and improving stability, resulting in higher user satisfaction and retention.
- Collaborated with **cross-functional** teams to implement new features, ensuring the app remained responsive to the dynamic needs of clinicians in a rapidly evolving digital healthcare landscape.
- Utilized **Core Data** for efficient data management and persistence, ensuring a smooth user experience even in offline scenarios.
- Integrated **REST APIs** for secure data exchange between the app and backend healthcare systems, enabling real-time access to patient data and seamless integration of medical records.
- Conducted **code reviews** and mentored junior developers on **iOS best practices**, ensuring high code quality and adherence to industry standards.

SKILLS

- Programming Languages:** Swift, SwiftUI, Objective-C, Java
- iOS Frameworks & Libraries:** UIKit, SwiftUI, Core Data, AVFoundation, ARKit, MapKit, Combine, Core Animation, Core Location, CloudKit, WidgetKit, Push Notifications (APNs)
- Tools & Technologies:** Xcode, Git, REST APIs, GraphQL, Firebase, Zoom SDK, CocoaPods, Swift Package Manager (SPM)
- Design & Architecture:** MVVM, VIPER, Clean Architecture, Design Patterns (Singleton, Observer, Delegate)
- Other Skills:** Agile Development, Code Review, Performance Optimization, Data Structures, Algorithms

PROJECTS

TuneSphere – Music Player App

- Built a music player app using **UIKit**, integrating **MediaPlayer** and **AVFoundation** for audio playback.
- Utilized **UserDefaults** to store user preferences (e.g., playback settings, theme selection).
- Designed a **dynamic UI** with dark mode and adaptive layouts, optimizing performance to reduce memory usage by **15%**.
- Implemented **background audio playback** to allow music to continue playing while the app is in the background, or the screen is off.
- Added **custom animations** and **gesture-based controls** (e.g., swipe to skip) to enhance the user experience.

BudgetTracker – Personal Finance App

- Developed a finance app using **SwiftUI** and **UIKit** for expense tracking, leveraging **Core Data** for transaction storage.
- Integrated **Charts framework** for visualizations and implemented **local notifications** for reminders.
- Reduced app launch time by **25%** through efficient data fetching.
- Added **data export functionality** to CSV for financial analysis and sharing with financial advisors.
- Implemented a **custom calendar view** using **UIKit** to allow users to track expenses by date with swipe gestures and dynamic updates.

CERTIFICATIONS

- iOS & Swift – The Complete iOS App Development Bootcamp from Udemy.
- Introduction to Artificial Intelligence certified by IBM.
- Python Data Structures certified by the University of Michigan.
